

## Candle Making Instructions

### Materials:

- warmed beeswax (each work station will get a bowl of warmed wax)
- a jar (with lid) - 1
- a wick – 1 or 2
- a coffee stirrer or pencil
- some cloves
- cinnamon sticks – 1 or 2

### Instructions:

- Bring all of the materials to your work station.
- Drape the wick over the coffee stirrer or pencil so that it hangs evenly on both sides.
- Then pour a small amount of wax (only a few millimeters deep) into the jar, with the two loose ends of the wick dipped and held into the hot wax. Using the coffee stirrer or pencil, hold the wick in place until the wax has hardened ensuring the wick stays in place. If you need more wax, add more wax to keep the wick in place.
- Once the first layer of wax has hardened, pour enough wax into the jar to fill it  $\frac{2}{3}$  full. Leave to cool.
- Place some broken cinnamon stick and some cloves around the inside of your jar, making a point of keep the spices away from the wicks as best as possible.
- Once the spices are in place, fill the jar the remaining  $\frac{1}{3}$  leaving room at the top for your wicks not to be smashed by the lid of the jar when it is closed.
- Once the wax has fully hardened, cut the loop in your wick to leave two distinct wicks. Cover and label your new Havdallah candle!
